INTRODUCING

EBPP for Lockbox

Electronic Bill Payment and Presentment

Online billing and payment processing is made easy with the new EBPP platform for Treasury Access Professional. Lockbox Customers can now deliver a self-service portal for their customers to review and pay bills online.

EBPP for Lockbox automates invoices transmission and speeds up payments. The portal provides quick and easy account status review and payment of outstanding invoices by integrating electronic payment methods such as credit card and ACH.

Designed to give consumers the flexibility they demand, it features a user-friendly, brandable interface for hassle-free payments while providing Lockbox Customers with unparalleled visibility into their customers' billing history and payments behavior.

Feature Highlights

Customer Portal —
Empower customers to choose one-time guest payments or enroll quickly for full service capabilities.

Multiple payment options —
Credit and debit cards, ACH (i.e., direct payment, electronic check), convenience payments, one-time payments, recurring payments and other payment types.

Easy and direct access to billing data —
Direct, transparent and easy access to billing information. Easy to use search function.

Customized email or text notifications —
Notifications when a bill is due, and directing customers to where they can view and pay their bills. Keep consumer's informed about the latest updates on billing and payment with alerts.

Privacy protection —
Industry standard security and user-authentication mechanisms for the protection of personal data.

Consolidated payment file —
While accepting multiple forms of payment through a multitude of payment channels, the ability to consolidate all Lockbox data into a single payment file (Lockbox Data Transmission) for import to the Lockbox Customer's ERP and accounting system.
