INTRODUCING
IC 3.5 for Lockbox
Item Capture

Item Capture (IC) is the latest addition to PowerDox's current Lockbox product suite. It is a scalable, customizable forms and check processing solution that seamlessly integrates with existing PowerDox applications including CDS, TAP, EMS and RDC. PowerDox IC provides modern tools for Item Capture, Data Entry, Customer Onboarding and Administration to bring better efficiency, flexibility and simplicity to Lockbox Processing. Capable of pocessing millions of business transactions daily, IC uses rules based workflow along with sophisticated recognition technology and validation capabilities to process virtually any document, form or check within a common architecture.   The system utilizes intelligent document recognition techniques to efficiently and accurately capture data.

Feature Highlights

Capture Device Integration —
Seamlessly integrates with today's modern capture devices to automate and streamline the processing of payments.

Remote Data Entry —
Conveniently key, verify or reject document items securely from any location using only a web browser.

Batch Workflow Management —
Display a list of current-day batches and batch states to efficiently manage work-load including batch item counts.

OCR Automation with Machine Learning —
Automate the reading of text on documents while building a machine learning repository to automatically identify and classify the type of document captured (Invoice, Check, Correspondence, Envelope, etc)
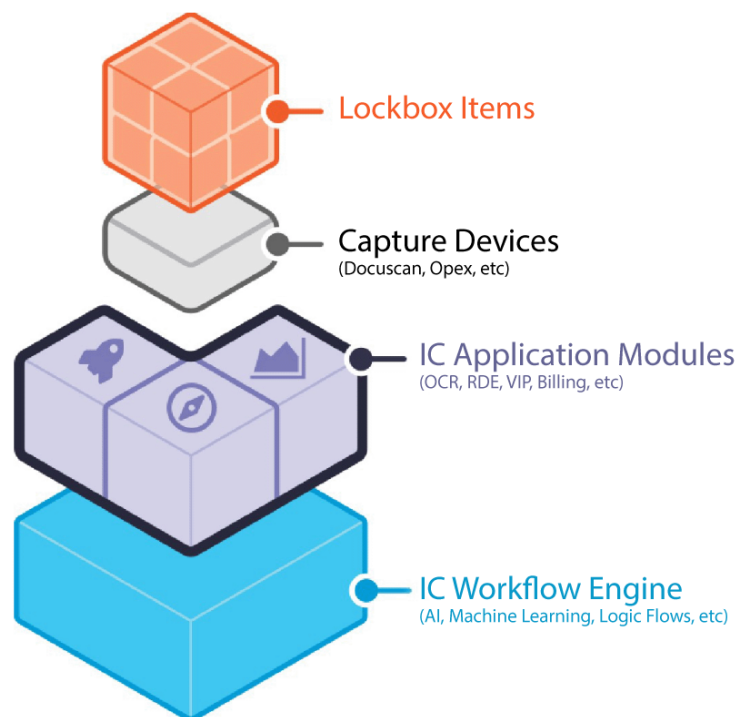

Form Recognition and Rubber Banding —
Form Recognition technology along with Rubber banding software to automatically identify the regions of a document that requires OCR detection.

Reporting —
Integrates with business analytics solutions such as Microsoft PowerBI to visualize data and share insights across your organization.

VIP Customer Onboarding —
Centrally manage and maintain Bank, Customer and Lockbox Profiles to automate and synchronize profile promotion.

Lockbox Items

Capture Devices
(Docuscan, Opex, etc)

IC Application Modules
(OCR, RDE, VIP, Billing, etc)

IC Workflow Engine
(AI, Machine Learning, Logic Flows, etc)

Additional Details —
- Support for all modern browsers
- Single Sign-On integration with AD and SAML 2.0
- Data Analytics including Operator Statistics, etc
- Administrator dashboard
- Integration with PowerDox Remote Data Capture (RDC)
- Integration with PowerDox Exception Management System (EMS)
- Integration with PowerDox Customer Delivery System (CDS 3.5)
- Integration with PowerDox Treasury Access Professional (TAP 3.5)
- Cloud Ready
